

LINOTYPE MACHINE HAS ARRIVED AT THE STAR OFFICE

The Star wishes to call the attention of its friends, subscribers and advertisers to the fact that its new linotype machine has arrived on the premises and will very soon be in running order to turn out your weekly paper in the same up-to-date fashion as any big daily in the province. This new machine will enable the Star to give the public greater service than could be done by means of the hand method of setting type which up to this time has been employed in the Star office. A great amount of news which had to be suppressed hitherto on account of the long process of setting will now be given to the local public every week.

The bringing of this new and up-to-date piece of machinery to the Star entails very considerable expense, but it shows the Star's faith in the future possibilities of Wainwright as a newspaper centre. The hope is, of course, that with the better printing facilities for news and in the jobbing and advertising departments our patrons and subscribers will be increased in number.

It may be interesting to know something of how this linotype works.

The principle of the machine is to assemble small brass matrices, or moulds, by means of operating a keyboard. These matrices are formed into words, separated by steel spaces, making a complete line, after which the operator sends the line off to the casting mechanism, where a line is cast in a short amount from molten type metal. This process is repeated in a gallery in the regular in which the copy is set at the keyboard. Meanwhile the matrices and spaces are carried to their respective places automatically, the matrices being directed into their proper channels in the magazine by means of different combinations of teeth, which causes them to fall into their proper places and follow down the incline of the magazine and be ready for use again when required by the operator, thus circulating through the machine automatically.

When the type is taken from the machine it goes through the same process as the other type, but being in solid lines is much more easily handled, and not so likely to be "piled" as is the individual type.

After the type from the machine has been used, it is put back into the metal pot and melted over to be made into new type again for the next issue. This creates quite a saving of time, as under the old system of using individual type all the characters have to be distributed by hand back into their proper boxes in a case, to be ready for use again.

With the addition of this new machine and a first class printer in the person of Mr. A. A. Thorsen, who has already taken up work, the Star is now in a position to turn out its work with neatness and despatch.

SPECIAL PHOTOPLAY

On Friday evening, the closing day of the exhibition, the Elite Theatre will offer to the Wainwright public and fair visitors special photoplays, six reels in all. There will be given Blue Bird five reel feature and extra comedy reel. Elite Theatre Friday evening August third at 8 o'clock.

Coming, by express every day fresh fruit, to Fraser & Co.

BIG PROGRAM AT ANNUAL FAIR NEXT THURSDAY AND FRIDAY; GRAND BASEBALL TOURNAMENT

The Wainwright Agricultural Exhibition, to be held this year, Thursday and Friday, August second and third, is becoming one of the permanent annual affairs that has a positive influence in the agricultural and commercial life of the community. Its beneficial effects are seen in the encouragement of the farmer and stock man this year more than ever before there will be greater display of live stock as well as of farm products.

The community has gained an enthusiasm for livestock in the last two years or so. Good crops in the last two years have enabled farmers to get pretty well on their feet, financially and they have learned by experience of poorer crops not to rely entirely on that means of support. They begin to guard against the perils of specialized grain farming and are taking out insurance against failure in that direction, in stock raising, cattle, sheep, pigs and poultry will, therefore, be very prominent this year at the exhibition.

Dairying has also been developing gradually in the district and at present indications show that more and better butter exhibits will be on hand.

A very handsome sum of money has been put up by local business men for the prize list.

Exhibitors and entrants in the sports events will receive some very valuable prizes in addition to cash rewards.

Amongst the big sports events are baseball games, horse races, foot races and novelty races.

There are one hundred and fifty dollars up for the ball games. Codogan, Hogbenden, Vermilion, Chauvin, Edgerton and Wainwright teams are amongst the competitors.

In the horse races there will be a harness event, for which there are three prizes. The best three in five winning the race. The running race is free for all best in three heats.

The pony race, will be a half mile run. Ponies must be four teen hands and under, best in three winning. Ladies horse race, running a quarter of a mile. Best two in three heats.

Foot races, free for all, one hundred yard dash, first second and third, best two in three. Boys race, for boys under fifteen years of age, one hundred yards first and second money. Girls race, for girls under fifteen years of age, fifty yards, first, second and third money.

In all the horse races except the ladies race an entry fee of ten per cent of the first prize money will be charged.

In foot races no entry fee is charged except in the case of the free for all 100 yard dash where ten per cent will be charged.

In the baseball events ten per cent of the first prize money will be charged as entry fee.

One new and very interesting exhibit at the fair this year will be that of the Great War Veterans. They will have demonstrations of trench work and of the means of warfare used in the present European struggle.

The music will be provided by the town band under the leadership of G. H. Beaudry. The department of Agriculture will assist the exhibition very materially again this year by providing the judges for the live stock. Judges for other work have been appointed from outside points and in some cases locally.

Taking everything into consideration the 1917 Fair should prove very popular and appeal to interested exhibitors and others for many miles around.

The secretary of the society, S. D. Mills is busy receiving entries, but all intending entrants and exhibitors are again reminded that 8 o'clock August the first is the very last moment at which applications will be received.

SMITH FAMILY NARROW ESCAPE FROM POISONING

There was porridge for breakfast as usual, in the G. A. Smith home last Monday morning but after partaking a few spoonful Mr. Smith noticed that the taste was not customary and suspecting something wrong from its effect on himself warned the rest of the family not to partake of the meal until investigation could be made.

Mr. Smith became slightly ill through the effects and Mrs. Smith recognizing this threw the poisoned porridge in the garbage can in the yard.

About this time two dogs came along to help themselves and ate all the porridge and in a few minutes were dead animals. Had the family partaken of the meal their would doubtless have been disastrous and deadly effects.

There is somewhat of a mystery attached to the affair as the meal came from a bag that Mrs. Smith had been using right along. There has been no explanation found up to date.

LIEUTENANT WEBB

A letter from Bill letted to Jack Brown states that Private W. T. Webb formerly of the Star office has received a commission and is now a lieutenant.

Mrs. H. Archibald left for the coast last week. She will holiday their for some time.

Mr. H. Y. Pawling was a week and visitor in Edmonton, bent on personal business.

Mrs. Fawling, during school holidays is assisting his father in the town secretary's office.

Miss Marie Mabey who has been visiting in the United States returned to her home here a few days ago.

Mr. S. R. Bowerman is having a large sign painted these days which takes the space of half a side of his big hardware store.

The secretary of the local branch of the Red Cross Society acknowledges the receipt of \$71.75 from the Battle River school district.

Bud Simmerman, the McLaughlin agent expects to unload a carload of McLaughlin specials about the first of August.

Madam Gozinski will be at the Fair Grounds Friday Aug. 3, to tell your past, present and future.

Mr. Trace, a conductor on the G.T.P. who has been living here for some years, with his family moved to Edmonton to take up residence there on Wednesday.

Mr. A. Crawford and party motored down from Edmonton in his new McLaughlin six on Tuesday to visit his farm at Greenshields.

Rev and Mrs. C. E. Kenny and little daughter, of North Bay, were week-end guests of Mr. and Mrs. R. A. Snyder. Mrs. Kenny is a sister of Mrs. Snyder. They are on a holiday trip through the west.

Miss Edith Pigeon gave an afternoon and evening party last Thursday in honor of her two cousins, Miss Hazel and Myrtle Lypps, who are visiting here from Ontario. The young ladies present report a very enjoyable time.

The guests were Edith Bowen, Ada Colfield, Dorothy James, Beta Love Faith and Ruth Douglas.

Blaze Started In Bowermans Store

Monday evening about 10 o'clock the fire brigade got a hurried call across the way to Bowermans Hardware store where fire had broken out in the rear of the building.

Mr. Bowerman happened to be in the store at the time and instantly gave the alarm. The brigade was on the spot almost immediately and had the flame extinguished by means of the chemical in a very short time.

There was little or no damage done to the store or its contents.

The fire, it appears was started through a gasoline lamp, the flame of which, unprotected by a glass shade, flared in the wind and caught some "waste" which was hanging from a shelf.

That the fire did not gain any headway was doubtless due to the fact that Mr. Bowerman was present at the time and the promptness of the response of the fire brigade.

Co-Operation Church Services

Beginning next Sunday, the last Sunday in July and continuing till the end of August, the Presbyterians and Methodists will conduct co-operative services. While Rev. R. K. Swenson is holidaying, Rev. Thos. Murphy, minister of the Presbyterian church will preach to both congregations. Morning service will be in the Methodist church at 11 a.m. and evening service in the Presbyterian church at 7.30. The Sunday schools will meet in their respective churches each Sunday morning at 10 a.m.

It is to be hoped these united services will meet with the hearty approval and support of all church people as the best plan for summer months.

Miss Florence Smith is visiting with friends in Edmonton.

Mr. and Mrs. L. Smith who were visiting Mr. and Mrs. Herb Smith, returned to Delbourne on Monday last.

Miss Louise Speer and Miss Josephine Varley of Edmonton are spending their holidays with Mrs. S. D. Lasell.

Principal and Mrs. W. S. Brodie returned from Edmonton on Wednesday. Mr. Brodie was on the staff of examiners in the departmental exams for the past two weeks.

Miss Lundy, who has been spending the holidays with her sister Mrs. Jack Armstrong at Edmonton passed through town Monday for her home at Heath.

Miss Brewer, who has for some time been in charge of the telephone department, left on Wednesday for Alix, where she will spend a few days before going to Castor, where she will assume duties in the government telephone office.

Mr. and Mrs. Kennedy and family of Bawlf Alta., motored over to Wainwright and are the guests of Mr. and Mrs. Archie McLean. Mrs. H. Dean and family of Manville are also visiting her parents Mr. and Mrs. McLean for a few days.

Rev. R. K. Swenson left on Monday for his holiday trip. He will be away about five weeks and during that time will visit the University of Chicago taking special lectures in a summer course there. It is also his intention to go to the Currier school of expression taking lessons in elocution and public speaking.

SPECIAL ATTRACTION BRINGS TO A CLOSE ANNUAL EXHIBITION

The Great War Veterans Association Wainwright Local Branch, will provide the closing entertainment for the annual two days exhibition. The dance, special music and refreshments which they will provide in the Elite Theatre on August the third, the closing day of the fair will serve a two fold purpose. It will give an excellent climax to the amusement and pleasure of the patrons of the fair who have come from far and near for that purpose and also give all who enjoy that kind of amusement, an opportunity of helping the comrades of the G. W. V. who have fought and are still fighting in defense of our country.

For full particulars of this entertainment see the posters which have been issued from this office, also tickets which are on sale by the Veterans and at the Veterans Headquarters on second avenue. A Grand dance and a grand time is promised to all who will attend.

LARGE GROWDS DECK BEACHES AT CLEAR LAKE

There must have been upwards of two hundred people from Wainwright and outside points at the lake on Sunday last and on Thursday half holiday the beaches are crowded.

Those camping there at present are: Dr. J. A. Little and family, The Linperts, Mr. Dickson, Mrs. McLaughlin and family, Mr. E. Cummings and family, Mr. and Mrs. Smart, Mr. and Mrs. J. Richards, Mr. and Mrs. Prauser and family and others.

A number of families and individual campers are making arrangements to camp there during the month of August.

Last Thursday H. C. Mann and S. R. Bowerman were the successful fishermen on the lake, catching eight big pike.

The diving raft has again been brought into requisition this year under the direction and superintendence of the master of ceremonies. It has a strong anchor and is considered to be within safe distance from shore for those who can swim.

The person of average height can scarcely touch bottom where it is anchored and non-swimmers are warned to be careful, in order that no accident may mar the pleasure that is to be found these hot days in the water.

Orange and banana special commencing Tuesday morning at Fraser & Co.

Dr. McQueen is attending professional duties at Viking this week. The Dr. will not return until the first of August.

D. Bissett, superintendent of the Farmers Elevators on this line was a visitor in town last Friday.

Mrs. C. Jefferson left for Biggar for a short visit on Wednesday.

Mr. Archie McLean who has been spending a few days at Innisfail returned home on Monday.

Mr. J. H. Brodie manager of the Greenshields elevator passed through here on Monday on his way to Edmonton where he spent a few days.

Mrs. A. D. Ferguson, who has been spending the past few weeks with friends in Edmonton and at Banff, returned home on Monday.

WHO IS THE MAN OR THE WOMEN TO TAKE THE LEAD

There is only one thing required to make the Great War Veterans new quarter comfortable, cheerful and fully useful and that is furnishings," says Howard Stutebury, general secretary of the soldiers aid commission, who in his official capacity visited the local branch here on Tuesday.

Mr. Stutebury's visit to the G. W. V. A. here was to officially turn over to them the work of the Military Hospitals Commission for the district. The soldiers aid commission which works in conjunction with Military Hospitals Commission, he said, he found could be safely placed in the hands of the local association which he found in very satisfactory running order of the importance of the work of the commission of which Mr. Stutebury has given a detailed account will be held for a later issue.

Speaking of the new quarters of the association here Mr. Stutebury urges that voluntary donations might be made of furnishings.

We who have not had an opportunity of doing our bit in France can make the boys feel that we appreciate them and their sacrifices. When they went away we all turned out with the band to see them off, wished them God speed and told them we would keep the home fires burning against their return. Some of us keep up an interest in them while they are "somewhere in France" some of us go to meet them at the depot when they come home, but how many of us think anything about them three days after? Do many of us think that Wainwright might have met the fate of many of the cities and towns of Belgium, that our dearest ones might have been subjected to the same unspeakable cruelties the women and children of Belgium have been? It is your Wainwright boys who stood shoulder to shoulder over there that have helped to make it possible for us to live in the same degree of comfort we did before the war.

What are you doing to do for the boys? They want these club rooms to help to meet your obligation to the boys who are coming.

Who is going to be the enthusiastic one to form a furnishings committee and undertake to make the home of the Wainwright G. W. V. A. the most comfortable and useful in Alberta.

Mechanical Man Enters Business

Resigning his position at Edmonton with the McLaughlin people Mr. J. Haase has entered business here and will be found at the McLaughlin garage on corner of Queens street and Fourth avenue.

For sometime Mr. Haase was employed by the McLaughlin people as an expert mechanic and his territory stretched from coast to coast. He was especially employed by his firm to look after the McLaughlin car in the road races at all the important fairs in the Dominion, a work which requires the highest possible skill and ability in mechanical work.

But the time came when Mr. Haase no longer was satisfied to work for a salary, and so decided to enter business for himself.

In looking around for a suitable town in which to start business, Mr. Haase says that Wainwright looked good to him and so decided to come here. He has opened up business at the McLaughlin show room and will carry a full line of car accessories, and is ready to do all kinds of repair on all kinds of machines.

Watch for Mr. Haase's, the new mechanical experts advertising space in the Star.

Mr. Don Pawsey and W. D. Murdock motored from Edmonton to Wainwright in their McLaughlin sixes on Tuesday. Mr. Murdock went on to Edmonton. Mr. Pawsey returning to Edgerton.

possible for us to live in the same degree of comfort we did before the war.

What are you doing to do for the boys? They want these club rooms to help to meet your obligation to the boys who are coming.

Who is going to be the enthusiastic one to form a furnishings committee and undertake to make the home of the Wainwright G. W. V. A. the most comfortable and useful in Alberta.

LOCAL SHOOTERS EARN MONEY AT BIGGAR

At a shooting tournament held at Biggar last week Mr. A. E. Mills and Norman Fenby carried off prizes.

There were forty shooters at the meet, but not withstanding this stiff opposition and the fact that a strong wind was blowing all the time, our two local champions succeeded in doing very excellent work.

Mills won nine out of twelve events. These were twenty bullet events too, in one event he smashed the entire twenty making a possible and in the other events he made the following: two sixteens, one eighteen, four seventeens and one sixteen.

Norman Fenby also did grand work but failed to get a possible one. These two gentlemen are to be congratulated on keeping up the reputation of Wainwright shooters.

St Thomas Sunday School Picnic

The Annual Picnic will be held on Thursday the 9th day of August 1917, at T. H. Wilcox farm, Parson's Lake to which all members, and others in sympathy with the church, are cordially invited.

Parents and children and others assisting, will please bring baskets, and meet at the Church at ten o'clock a.m.

Mrs. Fish and children are spending a few days at Ramsey Alta., at her fathers home.

Of great importance to you Remember Fraser & Co. sale July 30th to August 3rd. S. D. Mills spent a few days of this week in Edmonton on business.

Rev. Mr. Maddocks, of Edgerton, was a visitor in town last Monday.

THE EXHIBITION

THE BIG EVENT for this community as an agricultural people is the Fall Fair which comes this year on August second and third.

The fact that we are in the third year of the great war makes the melancholy and pessimistic person question the expense the annual Fair involves in Prize lists and the attractions. But we must not allow caution and timidity and lack of faith to put a drag in the wheels of progress. The directors of the Wainwright Agricultural Society, backed up by every worthy farmer in the district, is entering with an enthusiasm, unparalleled in former years, upon making this year's Exhibition bigger and better than ever before.

While the fact is recognised that the Wainwright Exhibition is primarily a "Farmers' affair", yet at the same time the town dweller has his part to play in making it a success. Many people will be attracted to it, people in various walks of life and with differing interests. Some will be attracted solely and entirely by the attractions or sports that the directors may provide, others will be interested in, what the officials of the Fair place in the fore front as of primary importance namely the exhibition of live stock and products of the soil, domestic manufactures and fancy work.

The directors of the Fair have shown considerable wisdom in making the true function of a "Agricultural" Exhibition stand out prominently, for upon this depends its future. If they should ever run it too much on the circus style it is doomed to failure. Of course they have the town dweller to consider too, who has his own ideas of the matter. It is safe to say that the majority of his kind, place paramount importance on the horse races and grand stand attractions and the evening entertainment rather than on the display of fancy work, cooking, pure bred stock and farm products. His tastes too, the directors must consider or his patronage and support will be lost.

The management has its eye on all this and is providing for the tastes of all. With good weather, and the earlier date this year, all other things being equal, the nineteen hundred and seventeen exhibition should be one of the best in the history of the town and country.

RULES AND REGULATIONS

INTENDING EXHIBITORS at the Fair should read and note carefully the rules and regulations on page two and three of the Prize list. Much of the harmony and success of the exhibition will depend on each one knowing and abiding strictly by the laws that have been laid down. There are twenty nine of these rules and regulations. Remember especially one or two of them.

"All protests against the ruling of the judges must be lodged with the secretary (S. D. Mills) the same day at the close of the exhibition, accompanied by a fee of \$5.00."

"All exhibits shall be bona fide property of the exhibitor, and in case of industrial work must have been executed by the exhibitor."

"Any exhibitor shall, if required by the secretary, make a statutory declaration that the goods shown by him or her are made in accordance with rules and regulations of the society, and in case any exhibitor refuses to make such declaration, on being requested, all premiums awarded him shall be forfeited."

"All special prizes confined to a radius of eighteen miles of Wainwright, except where otherwise specified. No person is eligible to compete for the special prize of which he is the donor."

"No exhibit shall be removed from the exhibition grounds until the close of the exhibition."

WHAT TO DO WITH THE LOAFERS

THE CONSCRIPTION BILL to all intents and purposes, is to get after the shirker, the loafer and give him a job in the army. Undoubtedly this measure will secure a great many new men to fill the ranks of those who have fallen in battle. But there are those who contend that these are not fit men to take the place of the bravest and the best. They say that the idlers, the men who would neither work nor enlist during the war before conscription will not show much manhood in the hour of danger. They are hardly the men to be given places of trust, where individual responsibility counts for so much in this war. The bill no doubt will decide the question of going into war for a great many who were not shirkers or loafers, but who need just such a measure to make up their minds for them. But the question still remains what to do with the real shirker? Will he be of much service when he is conscripted?

A NEW BOOK

DURING A SITTING of the House at Ottawa one day last week, a speech was made by the Hon. Frank Oliver which caused considerable amusement as well as grave considerations. He announced to Parliament that he had received a new book which had been prohibited from entering Canada, under a penalty of five thousand dollars or five years imprisonment. This book, which now everyone will be itching to read, has not only entered Canada, but was at that time in the possession of that Honorable gentleman himself. The book has disclosed the secret, is a power full arraignment of the liquor traffic in England. It is not likely, however, that we shall find as many, who will try to smuggle into the Dominion or her provinces this illegal work as the thing it condemns. We shall not, because of the difference in the fines be troubled so much with book bootleggers, as fire-water bootleggers.

FARMER ATTRactions ARE VERY NECESSARY

In a great many ways, at the present time the farm is the most attractive place in the country and its business the most productive of good and profit. Many people once thought the farm was the worst place on the earth to live, and who forebore it for town or city life, have returned again, lured back in many cases by the prospects of greater financial returns. Inquiry into the reasons for departure from the farms in the first place discloses, the all too apparent truth, that lack of common comforts the lack of attractive surroundings were amongst the causes of their desertion, especially in the case of the young man.

After the "golden glut" of the farms, made possible by present world conditions, has passed away other attractiveness must be made possible if the young people are to be held on the land.

It is true that for the first few years the farmer in the west has little time for beautifying his home and the grounds surrounding it. But after the first four or five years pass and he is beginning to get the land in shape attention should be directed to the artistic side of things.

There are two equipments necessary for every farm home, an equipment for work and an equipment for living. Too often the equipment for work receives much more attention than the equipment for living.

We are influenced by our surroundings more than we think or care to admit. Children especially are sensitive to these things. Many boys have been driven from the country to the city by the unattractiveness of their homes rather than by hard work of the farm. The unattractiveness of home surroundings and lack of common comforts have made many a farmer's boy dislike the farm. Every farmer owes it to his family and to himself the best that he can do in the way of equipping the farm home and making the home grounds beautiful in order that the fullest and richest life possible may be enjoyed by all. This more than anything else will make the farm hold its interests for the young men and women.

Not many farmers think of making their boys partners in his business. That is another cause of so much drifting away to other places of business in the town and cities. Not all boys are suited for farm work but those who are should be given every encouragement to fill their positions there.

The apprentice farmer will be more likely to become a willing worker if his interest is aroused in the business side of his work and he will gain ability to save if he is taught to spend thoughtfully and wisely. These two factors, willingness to work and ability to save, are fundamental for future success. Let the boy do some of the buying and selling. When he has decided that he will be a farmer the father may be gradually relieved from some of his responsibilities through partnership management.

WOLF INSPECTOR

Official notice has been received from the Provincial Department that P. E. Ross of this town has been appointed inspector of wolf bounty. Mr. Ross will assume this position immediately. All wolf hunters are instructed that bides must be inspected by him.

NOTICE

All farmers wishing to market their grain are hereby given notice that we will not be receiving grain into the elevator after July 31st until September 1st. The co-operative department, such as flour, feed and coal, will remain open.

A Car of Proven QUALITY

HE Ford has been on the market twelve years, surely long enough to have proven its high quality. There is nothing experimental about it. Every part has stood the test of time and proven its stability with hard service. No other car has ever approached the durability records of the Ford.

No matter what price you pay for a car you cannot get one with a stancher chassis. Government Laboratory tests have shown that the different parts of the Ford car are superior to those in any other car. Ford Vanadium steel has never been equaled in strength.

If you want a car that can plough through deep mud, sand and gravel—that can cross fields, corduroy roads and ford streams—that can climb the steepest hills with ease—that will give the greatest mileage all the year round with the least expense and care—then there is only ONE car—The Ford.

Thrill that brings Comfort instead of Sacrifice

THRIFT, the paramount national duty, applies to time as well as to money. To the small personal outlay as well as to the large family expenditure. Applied to the daily shave, thrift means the use of a

GILLETTE SAFETY RAZOR

The Razor of National Service.

The Gillette reduces shaving time to five minutes or less—an actual saving of a week of working days a year. To the man who depends on the barber, it saves still more time, and costs \$25 to \$50 or even more annually. This means the cost of one or several War Savings Certificates.

Moreover, there is not a man living with a beard to shave who cannot shave with a Gillette if he will use it correctly—with the blade screwed down tight and a light Angle Stroke.

For the thousands of young men just reaching shaving age the Gillette Safety Razor is a source of good habits—not only thrift, but punctuality, personal neatness, and efficiency in little things. For yourself or your son, at home or overseas, it is a splendid investment.

Write for literature. Gillette Safety Razor Co., Canada, Limited, Office and Factory 7 The Gillette Bldg., Montreal.

Victory Alone Can Bring Peace

German Government as Treacherous as Its Criminal

"Victory alone can bring peace," declares the Premier of the United Kingdom, Mr. Lloyd George. We agree with him. Peace of the sort that would allow the German Government to remain in power, to retain its strength and start its awful atrocities all over again would leave the world in a state of uncertainty. Every nation that prizes its independence would be forced to maintain vast armies and navies against the foe of humanity. The Socialist conference at Stockholm is a German trap. All the whippers of that kind come out of Germany and Austria as so dangerous as death-dealing poison.

Minard's Liniment Cures Colds, Etc.

Our Sure Shield

The nation we are convinced, is not ungrateful of the success which have been achieved at sea. They have exceeded all expectations, for we have experienced neither invasion nor starvation. The fleet is still our "sure shield" and it is the submarine piracy, owing to the license which characters it, is proving a temporary embarrassment. However the enemy from the stranglehold of our sea power—London Daily Telegraph.

There is a great deal of land changing hands in the Taber district. The Canadian ranch, which was put on the market last fall, is being bought up, partly by new settlers and partly by people living in the Taber district. The outside edge of the ranch on the northwest has all been disposed of to a depth of four or five sections.

Instant Postum

A table drink that has taken the place of tea and coffee in thousands of Canadian Homes.

"There's a Reason"

More Beer Will Not Take Malt. The temporary relaxation in the existing restrictions on brewing will have no additional malt grain produced, according to a statement issued by the Ministry of Food. No barley has been malted, says the statement, since February and no more will be malted until after the coming harvest. The effect of the contemplated relaxation of beer so as to meet the demands of the approaching harvest time.

Arrangements have also been made for reduction in the specific gravity of beer, thus enabling a larger quantity of light beer to be provided without any corresponding increase in the use of the grain already malted.

Fixing It Up. Marion was saying her prayers. "And please, God," she petitioned, "make Fortinault the spirit of Maine."

"Why, Marion?" said her shocked mother. "What nonsense are you saying? Marion settled herself comfortably in the bed."

"Cause I made it that way in my examination paper," she said, "and I want it to be right."

Playing Safe. We know of a fellow who is so afraid of war that he uses a military brush instead of a military brush—Courtland (C.) Herald.

Laying Out Fields Make Each Acre Work to Its Greatest Capacity

However desirable from a view point of order it may be, the outfields rectangular or square in shape, it is not always the logical thing to do when production is to be increased. That it is convenient to have fields regular in form is about the best that can be said about the custom.

The same reasons that would warrant a square field for the square corner custom, would also warrant a relative change in the number of acres devoted to various crops, such as potatoes, oats, barley and wheat.

These reasons lie in the character of the soil itself. Every farmer knows that certain parts of his farm are better adapted to corn, or to wheat, or to grass, as the case may be, than are other parts. In a general way perhaps, he tries to approximate relative crop areas with some consideration given to the fact that the soil is better adapted to the square corner field.

Some farmers, of course, have good intentions in this direction. Nature does not work with compass and level. She has no regard for straight lines. Her fields are laid down in irregular shapes. Then to make the most of her assistance, the farmer organizes his fields as may be, to follow her guidance and conform his field outlines to the soil conditions.

Almost never does it happen that soil characteristics will run uniformly over an entire field. The character of the soil changes, so does its capability for growing certain crops. When the farmer organizes his fields, he is the farmer who knows. Also he ought to know in a general way the character of the soil variety of his farm. Knowing these two things, he can then apportion his fields so that he can make each acre work to its highest capacity by growing that thing for which each acre is best fitted.

Every man who farms would find that a little time and money spent on a soil survey of his farm, locating and defining the various kinds of soil, and indicating the best use of each, is best fitted to grow, would be time and money well invested.

It would enable him to plan his fields so that each acre would be used to its greatest capacity. It might break up his usual checkerboard arrangement of crops, but it would result in an increased yield by intelligent adaptation of crop soil.

It is a common mistake to suppose that a rectangular field is the best. It is not. The most advantageous arrangement of fields is the one that is best fitted to the soil conditions. It is the one that is best fitted to the soil conditions. It is the one that is best fitted to the soil conditions.

It is a common mistake to suppose that a rectangular field is the best. It is not. The most advantageous arrangement of fields is the one that is best fitted to the soil conditions. It is the one that is best fitted to the soil conditions. It is the one that is best fitted to the soil conditions.

Untraced Wood Subject to More or Less Decay

Stiles built of untreated wood are subject to more or less decay. The deterioration usually occurs near the conditions of moisture favorable for the development of the fungus or decay. Decay may also attack any wood in any portion of the structure.

Of the various preservatives in general use, a good grade of coal tar preservative is very satisfactory for preserving timber. The methods used in the treatment of wood with this preservative ought to be added to the life of the wood.

Such as applying with a brush, dipping in the preservative or spraying, are not sufficient. By far the best method is to have the staves treated with the preservative in a closed room under pressure, and when so treated they should have indefinitely and should be more satisfactory to the purchaser.

Those who are considering the purchase of treated also should investigate carefully the methods used. The greatest permanence is desired should choose only material that has been thoroughly treated.

Stiles built of such material have the added advantage of reducing the cost of well-treated staves, and hence they can be kept light more easily. Another advantage is that well-treated staves are more durable and will last longer in the good graces of the German government.

To determine the effect of a preservative treatment upon the durability of wood, the University of Illinois began experiments in 1910 in co-operation with the University of Wisconsin. The experiments were begun in the treatment of wood had not commenced to decay after a period of ten years.

The effect of the treatment upon the durability of the treated wood upon the surrounding atmosphere was also determined. The treated wood was found to be more durable than the untreated wood.

Ranchers' Fair and Live Stock Show

Thousands of dollars in prizes have been put up by the Executive of the Ranchers' Fair and Live Stock Show for the great Stampede to be held at Moose Jaw each day during the fair, July 17th to 20th, and the handsome lot of awards is attracting entries from some of the most famous cowboys of Canada and the United States.

The plan for this year's Stampede is a far larger and more interesting program, plans having been made for a week, with a much more complete program, plans having been made for a week, with a much more complete program, plans having been made for a week, with a much more complete program.

Wild horse races, cowboy relay, the thrilling bucking horse riding contests, and the most spectacular event of the Stampede, the barrel racing, in addition to the other regular Stampede features will be on the program. A number of famous cowboys have also given notice of their intention to enter, and thus add color to the event.

Ad. F. Day, of Medicine Hat, who has consented to take charge of the Stampede again this year, is making special effort to secure a large attendance. He says that the day has never before been ridden, and has put the executive that he expects to bring a herd of the kind that test their men up and bite on the Stampede.

The All-Canadian Championships at Moose Jaw this year will be notable because of the galaxy of stars of the sport and saddle, who have come to Moose Jaw from all over the world.

The ration for a horse of a pound of grain and a pound of hay per day is a standard. The horse doing light work may receive more hay and less grain, but the horse doing heavy work should receive approximately the above amount of hay and enough grain to keep him in condition.

For the past seven years our work horses and mules at the Illinois Experiment Station have been fed for the most part, legume hay. Their grain ration has been either corn or clover hay, and oat straw.

It is essential to feed a good quality of legume hay. For our work horses, the most satisfactory is alfalfa hay. The alfalfa hay should be green, not too dry, and should contain a good deal of water-soluble carbohydrates.

Second Avenue Wainwright

The Immortal Coward.

By HERBERT KAUFMAN
We are the Cowards Immortal--the men who have feared dishonor and who quailed at shame.
Because we respected self more than life and dreaded degradation more than death, our names are flaming torches.
We saw the whip the Parolan brought for Greece and there--

we saw the eagle of Rome and million spears, and every Alpine pass has heard our trembling prayers beseech kind God for strength to perish if we might not hold our mountain's crown freedom.

And we not pealed beside our women as the Turk set forth to sweep the West we would have failed to beat him back. No wound that weapon brings could make a torture comparable to their debasement.

And at Waterloo because retreat demanded all our pride we chose the path to glory and blessed the bayonets in our breaking hearts.

From Concord and from Alamo we call to you from Vally Forge and from Balaklava from the wastes and the wilds and the frontier blockhouses and from every grave that marks a martyrdom we cry you to your duty--carry on!

The price of liberty is dear but liberty is more precious than its dearest price.

Fear God and conscience and humiliation and injustice and defeat; serve your fears with valor and defend the high faiths of Humanity--From August, 1917, Cosmopolitan.

ST THOMAS CHURCH

Sunday July 29 Eighth at Trinity, 10 a.m. Sunday school and Bible class, 11 a.m. matins and sermon, 12 o'clock Sacrament of Holy Baptism, 7.30 Evening. Morning and Evening Preacher--The Vicar.
